Forecast for Wednesday 23 Oct 2024

Weather: A cloudy morning with some patchy drizzle mainly over southern and western fells though it will be mainly dry. A few sunny intervals in good shelter. In the afternoon cloud lifting and also breaking to an extent with more chance of a few sunny intervals especially later . Some clear spells in the evening but some low cloud again forming over the hills.

Chance of cloud-free hill tops above 800m: 10% in morning rising 70-80% by mid afternoon dropping 50% during the evening

Low cloud and visibility: Fairly extensive cloud of cloud above 500m in morning and hazy below the cloud but this lifting and breaking in the afternoon with mostly good visibility, just a few patches of cloud lingering on higher fell tops. Some cloud again lowering onto higher hills during the evening.

Meteorologist's View

Nothing additional

Forecast for Thursday 24 Oct 2024

Weather: Another mainly dry day. Any low cloud lifting off the tops in the morning, with a mixture of sunny intervals and cloudier spells in the afternoon. Best breaks in the north, while southern felltops likely to stay mainly cloudy and shrouded. Cloud becoming overcast in the evening with perhaps some rain towards midnight.

Maximum wind: South to southeast 25 gusts 35mph.

Chance of cloud-free hill tops above 800m: 40% at first rising 80% from mid morning, but 60% in south, gradually falling 20% or less as the evening goes on.

Low cloud and visibility: Areas of cloud above 500-600m at first tending to break and lift off most hills during the afternoon though some patches persisting over southern summits. Good visibility away from the cloud. Then by mid to late evening extensive cloud above 500-600m, visibility also dropping at lower levels in any rain that arrives later.

Temperature: **Valleys:** Plus 10 rising to Plus 15 Celsius.
At 800m: Plus 6 rising to Plus 9 Celsius.
Freezing level: Above the summits.
